

STV 202: Project Objectives The objectives of this project are for students to 1. Exercise their skills in critical thinking about technology and society, 2. Demonstrate their ability to apply the course material in an original manner, 3. Enhance their proficiency in written expression, and 4. Consider design issues from a technology-society perspective, and help others do the same, through group work. Topic example Architects in Singapore have designed some bus stops to be more inviting and useful to users. You may need to edit this URL after pasting it into your browser. Instructions As a part of its commitment to student well-being, the University of Waterloo is seeking suggestions about how to improve campus life and enhance student experience. In particular, the University is considering how it could make the new campus LRT stop and area (between DC and E5) more inviting and useful to people using the service. A committee has been formed to solicit and evaluate proposals from members of the University community to help it achieve this goal. Your group has decided to submit a proposal
